The book is written for a broad audience, including students, researchers, and practitioners in cognitive science, linguistics, artificial intelligence, and related fields. No prior knowledge of computational modeling is required.

Key Features

- Comprehensive coverage of the field of computational cognitive modeling
- Clear and accessible writing style
- Up-to-date coverage of the latest research
- Extensive references and further reading

Table of Contents

- 1.
2. Perception
3. Attention
4. Memory
5. Language
6. Reasoning
- 7.

Author

The book is written by Ronald Sun, a professor of cognitive science at the University of California, Berkeley. Sun is a leading researcher in the field of computational cognitive modeling and has published extensively on topics such as language, memory, and reasoning.

Reviews

“This book is a must-read for anyone interested in the field of computational cognitive modeling. Sun provides a comprehensive and accessible

overview of the field, covering a wide range of topics from perception to reasoning. The book is well-written and up-to-date, and it includes extensive references and further reading.”

— Steven Pinker, author of *The Language Instinct* and *How the Mind Works*

“This book is an excellent to the field of computational cognitive modeling. Sun provides a clear and concise overview of the field, covering the key concepts and research methods. The book is well-written and accessible to a broad audience, including students, researchers, and practitioners.”

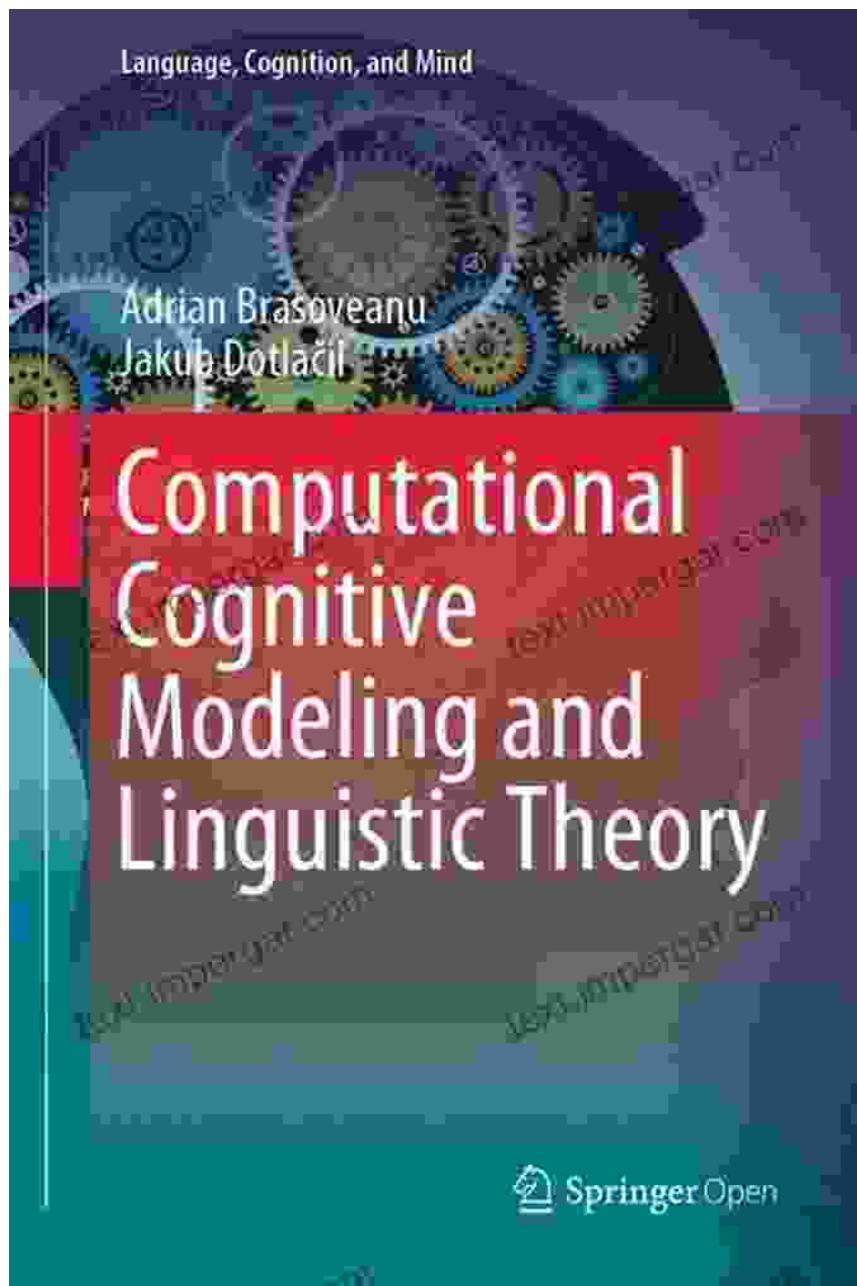

— Douglas Hofstadter, author of *Gödel, Escher, Bach: An Eternal Golden Braid*
