By Terry Turchie

In the wake of 9/11, America was promised a new era of security. But as the years have passed, it has become increasingly clear that our homeland is far from secure. In fact, we are facing a growing number of threats that could potentially cripple our nation and destroy our way of life.

In his groundbreaking new book, *Homeland Insecurity*, investigative journalist Terry Turchie exposes the hidden vulnerabilities that threaten our nation. Drawing on years of research and exclusive interviews with top security experts, Turchie reveals the startling truth about the threats we face, including:

- The rise of global terrorism and the threat of a devastating attack on American soil
- The growing threat of cyberattacks on our critical infrastructure, such as the power grid and financial system
- The porousness of our borders and the threat of illegal immigration, drug trafficking, and human trafficking
- The growing problem of weapons smuggling and the potential for a mass shooting or terrorist attack

- The rise of money laundering and the threat of financing terrorism and other criminal activities
- The corruption of our political system and the threat of foreign influence
- The failures of our intelligence community and the need for reform
- The apathy, complacency, ignorance, denial, fear, propaganda, misinformation, and disinformation that are making us more vulnerable to attack

Homeland Insecurity is a wake-up call for America. It is a must-read for anyone who cares about the security of our nation and the future of our way of life.
