The book begins with the student-led land occupations of the 1960s and 1970s, a period of intense social and political upheaval. These occupations

were often motivated by a desire to create more democratic and inclusive educational spaces, as well as to protest the Vietnam War and other injustices. In recent years, there has been a resurgence of student activism and land reclaiming, with students around the country occupying schools and universities to demand free tuition, divestment from fossil fuels, and the creation of more sustainable and just campuses.

Occupying Schools Occupying Land is essential reading for anyone interested in the history of education, social movements, or the future of our planet. This book offers a powerful reminder of the transformative potential of student activism and land reclaiming, and it provides a valuable resource for those who are working to create a more just and sustainable world.
